

# Wind power generation industry trends in the first quarter

"The first quarter of 2024 set the pace for the year, underscoring both an industry that continues to break barriers and the increasing demand for clean energy solutions," said John ...

The first half of 2025 has been a defining period for the global wind energy sector - not only for its record-breaking growth but for the clarity it provides about the world's energy direction.

"The surge in first quarter wind installations, combined with a strong development pipeline, underscores the wind industry's resilience and its capacity to rapidly deliver the clean, affordable, ...

Market players that balance price competitiveness with supply-chain diversity appear best positioned as the wind power market matures into critical power infrastructure.

US Wind Energy Monitor(TM) is a collaboration between American Clean Power and Wood Mackenzie, delivering the most in-depth analysis and forecasts on the US wind industry through quarterly reports.

Based on data provided by the StartUs Insights Discovery Platform, we observe that the wind energy market stands out in the following categories relative to the 20K+ technologies and ...

Current, comprehensive coverage of the Wind Power Generation Industry. Includes: industry forecasts, trends, financial information & detailed analysis. Updated 12/1/2025.

Despite the cost-competitiveness of wind energy and ambitious targets in countries around the world, numerous obstacles continued to impede the wind industry. The industry continued to innovate, ...

The Q1 U.S. wind market exceeded 2024's pace, more than doubling activity with 2.1 GW of installations -- but regulatory uncertainty led to a significant pullback in wind-turbine orders, ...

The adoption of more cost efficient and higher energy producing designs and larger wind turbines is leading to a greater penetration into the wind power market. Furthermore, innovations in materials, ...
